

BEFARD

**ELECTRIC
TRANSPORTER**

UR800

BEFARD UR800

PRECISION AND SAFETY

BEFARD UR. Designed and manufactured entirely in Poland, it is indispensable for heavy-duty transport. It utilizes an eco-friendly electric power source. An additional advantage of this solution is its quiet operation.

BEFARD UR is used for transporting and towing loads. We offer a wide range of additional equipment. Thanks to its well-thought-out design, attachments can be quickly and easily replaced. All BEFARD products are CE certified, meaning that our products comply with EU machinery directives.

ADVANTAGES

ELECTRIC TRANSPORTER

- Efficiency
- Ergonomic
- Eco-Friendly
- Agility
- Easy to use
- Greater safety
- Low operating costs
- No harmful exhaust emissions
- No harmful noise
- Relieves strain on the musculoskeletal system
- Wide range of optional equipment
- Can be used indoors and outdoors

POWER SUPPLY

OF THE ELECTRIC TRANSPORTER

The device is powered by two AGM batteries that are maintenance-free, resistant to low temperatures, shocks, and vibrations, can operate in any position, and provide longer operating time, higher output voltage, and high performance under heavy loads.

TECHNICAL PARAMETERS

Power supply	AGM batteries
Charger	included in the set
Lifting capacity	800 kg
Weight	about 250 kg
Width	about 85 cm
Drive	4x4

WHAT IS MOST IMPORTANT YOU HAVE IT AS STANDARD

- Pneumatic wheels
- Two AGM batteries
- Battery charge indicator
- Two driving modes
- Carrying eyes for belts
- Swivel wheels on one axle
- Limit switch
- Ergonomic non-slip handle
